

Mr. Bryan Forsmann

Diversified Experience in Quality Control, Welding inspection, Glovebox design, testing, and experimentation.

Phone: 208.533.7377

E-mail: bryan.forsmann@inl.gov

Education: Mr. Bryan Forsmann is currently enrolled as a senior and pursuing a Business Finance degree from Idaho State University. He has an Associates Degree from Eastern Idaho Technical College in Quality Assurance/Nondestructive Testing.

Work experience: Mr. Forsmann has been employed at the INL for 15 years as a Senior Engineering Technician. He has 18 years experience in Welding Inspection, and other nondestructive examinations. He has spent 7 years installing and modifying gloveboxes for various research and development projects. He has spent the last five years working in the Analytical Laboratory at MFC. He is the Subject Matter Expert

on all gloveboxes in the AL. He is currently involved with the Advanced Fuel Cycle Initiative program where he blends and casts one of a kind fuel designs.

Professional endeavors: Mr. Forsmann has worked on a broad range of research and development projects at the INL. He has used his inspection qualifications to support nuclear programs, and the new Space Battery program. He continues to work in the Casting Laboratory to improve the casting process used to make the different fuel types.
